Compliance default: ICSI urges govt to extend waiver scheme to more cos

The Indian Society for Clinical Immunology and Immunogenetics (ICSI) urges the government to extend the waiver scheme for clinical trials, which was introduced by the Ministry of AYUSH in 2015, to more cos.

ICSI, in a letter to the Ministry of AYUSH, has stated that the waiver scheme has been beneficial in conducting clinical trials for ayurvedic and naturopathic medicines, but it has not been extended to other cos. The scheme allows cos to conduct clinical trials without the need to comply with certain regulations, thereby reducing the time and cost of conducting clinical trials.

The ICSI letter highlights the importance of the waiver scheme in accelerating the development of ayurvedic and naturopathic medicines, which can address unmet medical needs and improve the quality of life for patients. The ICSI urges the government to extend the waiver scheme to other cos to support the development of ayurvedic and naturopathic medicines.

Pune lockdown: E-comm food delivery apps can’t work

In response to the Pune lockdown, food delivery apps like Zomato and Swiggy have reported issues in delivering orders in the city.

According to the reports, the lockdown has caused difficulties for delivery partners in the city. These apps have also faced challenges in fulfilling orders due to the closure of certain roads in the city. The lockdown has also affected the availability of delivery partners, as many are unable to work due to the restrictions.

KPTTech designs portable ventilator for Covid treatment

KPTTech, a technology company based in Pune, has designed a portable ventilator for Covid treatment. The ventilator is designed to help hospitals manage the surge in Covid patients.

The portable ventilator is lightweight and compact, making it easy to transport and use in hospitals. The company claims that the ventilator is effective in managing Covid patients and can help hospitals to manage the surge in Covid patients.

The portable ventilator is currently being tested and evaluated by hospitals in Pune. The company plans to launch the ventilator in the market after completing the necessary tests and evaluations.

The portable ventilator is designed to help hospitals manage the surge in Covid patients and can be an effective solution for healthcare providers during the pandemic.
