OPERATIONS

The brokerage income earned by the Company increased from Rs. 48.42 crores in the previous year to Rs 61.12 crores in the current year. However, the profit after tax registered a drop of 33% to Rs. 7.22 crores against Rs. 10.81 crores in the previous year.

This fall is mainly due to a drop in Account Opening fees collected during the year as also an increase in staff cost, which was consequent to benchmarking staff salaries to market salaries. The benchmarking of staff salaries to market salaries was necessary to retain key and experienced staff.

PROSPECTS AND OUTLOOK FOR THE FUTURE

Economic Outlook

Total FDI inflows during April-December 2006 stood at US\$ 9.3 billion, as compared to US\$ 3.5 billion in the corresponding period last fiscal. This is consequent to India emerging as one of the most favoured private equity destination attracting US\$ 12.39 billion worth investments in January 2007. The foreign exchange reserves rose from US\$ 151.6 billion at end March 2006 to US\$ 199.18 billion at end March 30, 2007.

The Union Finance Budget 2007-08, attempts to provide continuity to the current policy approach rather than push

through any new reform agenda. The fiscal deficit of the Centre as a proportion of GDP has come down from 6.2% in 2001-02 to 3.7% in 2006-07.

However, inflation remains a key concern. RBI has taken various steps to control money supply, credit growth and inflation. It is hoped that these measures will have the desired effect soon and may not affect the growth of the economy in any significant manner.

Capital Market Outlook

The year under review was good for the capital market. Major factors positively impacting the bourses this year were

- firm global market/strong economic outlook buoyed by the increasing flow of money from foreign funds;
- global acquisitions and mergers across the country;
- focus of the Union Finance Budget on infrastructure, agriculture and farm credit, education and healthcare

However, expectations of higher growth in GDP and corporate earnings have currently made the Indian markets, the most expensive market among all emerging markets and also among all markets in Asia. Considering the liquidity pressures on the economy and the continuous uni-directional movement of the market, a short-term correction is expected. The long-term outlook of capital market remains buoyant.

DIVIDEND

With a view to utilise the reserves for expansion, no dividend is proposed for the year under review.

Principal accounting policies

A. Basis of preparation

The accounts are prepared on historical cost convention, on accrual basis of accounting, and conform to accounting principles generally accepted in India.

The preparation of the accounts requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) as of the date of the accounts and the reported income and expenses during the reporting period. Management believes that the estimates used in preparation of the accounts are prudent and reasonable. Future results could differ due to these estimates and differences between actual results and estimates are recognised in the periods in which the results are known/materialise.

B. Significant accounting policies

1 Revenue recognition

- Income from brokerage activities is recognised as income on the trade date of the transaction. Brokerage is stated net of rebate.
- Income from other services is recognised on completion of services.

2 Fixed assets and depreciation/amortisations

Fixed assets are capitalised at cost. Cost includes cost of purchase and all expenditure like site preparation, installation costs, and professional fees incurred for construction of the assets, etc. Subsequent expenditure incurred on assets

put to use is capitalised only where it increases the future benefit/functioning capability from/of such assets.

Costs incurred for the development/customisation of the Company's website, Front-office System software and Back-office system software are capitalised.

Depreciation is charged over the estimated useful life of the fixed asset on a straight-line basis as under:

- Leasehold improvements Over the primary period of lease.
- Computer Hardware – Personal Computers 3 years
- Computer Hardware – Others 4 years
- Computer Software 5 years
- Office equipments 6 years
- Furniture and Fixture 15 years
- Website Cost 5 years
- Motor cars 4 years
- Bombay Stock Exchange Card 10 years

Fixed assets costing less than Rs. 5,000 are fully depreciated in the year of purchase.

3 Investments

All investments of long-term nature are valued at cost. Provision is made to recognise a decline, other than temporary, in the value of Long-Term investments. Current investments are valued at cost or market value, whichever is lower.

4 Retirement benefits

The Company provides for gratuity covering all employees. The Company makes annual contributions to a fund administered by the trustees and managed by HDFC Standard Life Insurance Company Ltd. for an amount notified by HDFC Standard Life Insurance Company Ltd. The Company accounts for the liability for future gratuity benefits based on an actuarial valuation carried out as at the end of the year.

Contribution to the provident fund is recognised when due. Provision for Superannuation is on accrual basis. The Company does not have a Leave Encashment policy.

5 Taxes on Income

Current tax is determined as the amount of tax payable in respect of taxable income for the year, using applicable tax rates and laws.

Deferred tax is recognised, subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the differences between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. They are measured using substantively enacted tax rates and tax regulations.
